an Interscience® Publication
published by JOHN WILEY & SONS

The *Journal of Polymer Science* is published as follows: *Polymer Chemistry Edition,* monthly; *Polymer Physics Edition,* monthly; *Polymer Letters Edition,* monthly; *Polymer Symposia,* irregularly.

Published monthly (one volume per year) by John Wiley & Sons, Inc. Copyright © 1979 by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 or 108 of the United States Copyright Law without permission of the copyright owner is unlawful. Second-class postage paid at New York, New York, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center, Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price (1980): $585.00 per volume. Postage and handling outside U.S.A.: $48.00. Please allow 4 weeks for change of address. Back volumes, microfilm, and microfiche are available for previous years. Request price list from publisher.

Claims for undelivered copies must be made no later than three months following month of publication. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

Journal of Polymer Science: Polymer Chemistry Edition

Contents, Volume 17, 1979

Issue 1, January 1979

Polymerization of Methyl Methacrylate Initiated by Mn(III)–Glycerol Redox System
P. L. Nayak, R. K. Samal, and M. C. Nayak 1

Syntheses of *N*-Substituted Carbazoles Involving Polymerizable Terminal Vinyl Groups
H. Kamogawa, H. Koizumi, and M. Nanasawa 9

Photopolymerization of Methyl Methacrylate Sensitized by Aliphatic Ketones
E. A. Lissi, M. V. Encina, and M. T. Abarca 19

The Chemistry of THPC–Urea Polymers and Relationship to Flame Retardance on Wool and Wool–Polyester Blends. I. Chemistry of THPC–Urea Polymers
A. Basch, B. Zvilichovsky, B. Hirshmann, and M. Lewin 27

The Chemistry of THPC–Urea Polymers and Relationship to Flame Retardance on Wool and Wool-Polyester Blends. II. Relative Flame-Retardant Efficiency on Wool, Polyester, and Wool–Polyester Blends
A. Basch, B. Nachamowitz, S. Hasenfratz, and M. Lewin 39

Radiation Degradation Susceptibility of Vinyl Polymers: Nitriles and Anhydrides
J. N. Helbert, E. H. Poindexter, G. A. Stahl, C.-Y. Chen, and C. U. Pittman, Jr 49

Linear Dimerization of 1-Phenylbutadiene by Acid Catalysts
T. Higashimura and H. Hasegawa 59

Kinetics and Mechanism of the Cationic Polymerization of Tetrahydrofuran in Solution: THF-CH_3NO_2 System
K. Matyjaszewski, S. Słomkowski, and S. Penczek 69

Polymerization of *N*-(Fluoro Phenyl) Maleimides
J. M. Barrales-Rienda, J. González Ramos, and M. Sánchez Chaves 81

Mechanism of the NCA Polymerization. VI. Investigations on Cocatalysts of the Base-Initiated NCA Polymerization
H. R. Kricheldorf 97

Emulsifier-Free Emulsion Polymerization of Tetrafluoroethylene by Radiation. II. Effects of Reaction Conditions on Polymer Particle Size and Number
T. Suwa, T. Watanabe, T. Seguchi, J. Okamoto, and S. Machi 111

Emulsifier-Free Emulsion Polymerization of Tetrafluoroethylene by Radiation. III. Simultaneous Formation of Hydrofluoric Acid
T. Suwa, T. Watanabe, J. Okamoto, and S. Machi 129

Reaction of Poly(vinyl Chloride) with Superoxide Anion
Z. Osawa, H. Nakano, E. Mitsui, and M. Nakano 139

Cyclic Acetal-Photosensitized Polymerization. VII. Photopolymerization of 2-Vinyl-4-Hydroxymethyl-1,3-Dioxolane
T. Ouchi, T. Nakamura, and K. Yonekura 147

^{1}H-NMR Spectra of Poly(ethylene Glycol)s in the Presence of Shift Reagent
T. Okada 155

Effect of Structure on Properties of Aromatic-Aliphatic Polybenzimidazoles. II
I. K. Varma and Veena 163

Ferrocene-Containing Polymers. I. Radiation-Induced Polymerization of Ferrocenylmethyl Methacrylate
K. Tsubakiyama, T. Matsuo, T. Sasaki, K. Yoshida, T. Fujimura, and K. Araki 173

Ring Retention in the Homopolymerization of Cyclic Olefins by Rhenium Olefin Metathesis Catalysts
C. Tsonis and M. F. Farona 185

High-Molecular-Weight Hydrolyzed Polyacrylamides. II. Potentiometric Titrations
J. C. Fenyo, J. P. Laine, and G. Muller 193

Thermal Decomposition of Poly(butylene Terephthalate)
R. M. Lum 203

Copolymerization of Carbon Disulfide and *N*-(β-Cyanoethyl)ethylenimine
K. Soga, I. Hattori, M. Sato, and S. Ikeda 215

Dilute Solution Properties of Methyl Methacrylate–Acrylonitrile Copolymer (MA2)
A. K. Kashyap and V. Kalpagam 225

Prediction of the Directional Effect of Pressure on the Reactivity Ratios in Free-Radical Copolymerization
G. Jenner 237

Photocrosslinking of Poly(methyl Acrylate)s Containing the 1,3-Dioxolane Structure as a Pendant Group
Y. Nakashima and H. Fukuda 245

Alternating Polyampholytes Prepared by Hydrolysis of Copolymer of Maleic Anhydride and *N*-Vinylsuccinimide
J. Furukawa, E. Kobayashi, and T. Doi 255

Notes

ESR Signal of Polymer Film Formed in Xylene Plasma
T. W. Scott, K.-C. Chu, and M. Venugopalan 267

Attempted Anionic Homo- and Copolymerization of Vinylcymantrene, Ferrocenylmethyl Acrylate, η^6-(Benzyl Acrylate)tricarbonylchromium, and η^4-(2,4-Hexadien-1-yl-Methacrylate)tricarbonyliron
C. U. Pittman, Jr. and C. C. Lin 271

Polymeric Hydrazides by Reaction of Hydrazine with Polymeric Benzotriazolides
P. Ferruti, M. C. Tanzi, and F. Vaccaroni 277

Oligomerization Stereochemistry of Vinyl Monomers. 5. Methyl, Isopropyl, and *tert*-Butyl Acrylates
C. F. Tien and T. E. Hogen-Esch 281

Phosphonylation of an Unsaturated Polyester
C. Azuma, K. Sanui, K. Koshiishi, and N. Ogata 287

Determination of Trace Elements in Poly(methyl Methacrylate) by Neutron Activation Analysis

V. Sankaran and C. S. Marvel 3949

Pyrolysis/Gas Chromatography/Mass Spectrometry of Polymers: Polyisopropenylcyclohexane and Copolymers with its Aromatic Counterpart, α-Methylstyrene
R. J. Gritter, E. Gipstein, and G. E. Adams 3959

X-Ray Diffraction Technique to Assess Radiation Damage in Semicrystalline Polymers. I. Isotactic Poly(methyl Methacrylate)
R. P. Kusy and A. R. Greenberg 3969

Cyclic Acetal-Photosensitized Polymerization. VIII. Photopolymerizations of Diallyidene Pentaerythritol and its Derivatives
T. Ouchi, M. Tatsumi, and M. Oiwa 3979

Radiation-Induced Terpolymerization of Tetrafluoroethylene with Propylene and Isobutylene in Bulk
G. K. Kostov, O. Matsuda, T. Watanabe, S. Machi, and Y. Tabata 3991

A Two-Stage Stress-Dependent Creep Mechanism in Plasticized Poly(vinyl Chloride) (PVC)
R. Kamel, E. Najeeb, Y. A. Badr, M. A. Semary, and M. A. Hadhoud 4003

Effect of Polyion Conformation on Dye Binding. IV. Fluorescence of Auramine O in Relation to its Binding to Synthetic Polyacids
B. Erny and G. Muller 4011

Application of Environmental Relaxation Model to the Transport Behavior of Glass-Forming Melts
N. Islam and I. Kochi 4021

Influence of Antimony Catalysts with Hydroxyethoxy Ligands on Polyester Polymerization
S. B. Maerov 4033

Hydrolysis of Dextrin in the Presence of Block Copolymer of Vinyl Alcohol and Styrenesulfonic Acid
K. Arai and Y. Ogiwara 4041

Amorphous Polyacrylonitrile: Synthesis and Characterization
Y. Joh 4051

Polyelectrolytes Conformational Probes: Auramine O and Ethidium Bromide Interactions with Hypercoiling Maleic Acid–Olefin Copolymers
J. C. Fenyo, L. Mognol, F. Delben, S. Paoletti, and V. Crescenzi 4069

Crosslinking and Scission Yields for Polystyrene Subjected to γ Irradiation *in vacuo*
J. H. O'Donnell, N. P. Rahman, C. A. Smith, and D. J. Winzor 4081

Polymerization of Allyl Esters of Unsaturated Acids. IV. Copolymerization of Diallyl Maleate
K. Urushido, A. Matsumoto, and M. Oiwa 4089

Kinetics of Polymerization Initiated by Mn^{3+}–Substrate Redox System. I
P. Elayaperumal, T. Balakrishnan, M. Santappa, and R. W. Lenz 4099

NOTES

Studies of the Polymerization of Diallyl Compounds. XXIX. Polymerization of Diallyl Tartrate Diacetate
T. Ohata, K. Kasahara, A. Matsumoto, and M. Oiwa 4107

Preparation of Steroid Esters of Hydroxypropyl Cellulose
S. Yolles, J. F. Morton, and M. F. Sartori 4111

Nitrosyl and Nitryl Hexafluorophosphates: New Initiators for the Polymerization and Graft Copolymerization of Tetrahydrofuran
Y. Eckstein and P. Dreyfuss 4115

Separation and Identification of Poly(ethylene Terephthalate) Oligomers by Gel Permeation Chromatography
S. Shiono 4123

Synthesis of Thermally Stable Polyamide Hydrazides
J. S. Shukla and H. Dwivedi 4129
